For: **Internal Auditor InternalAuditor@ecora.com**

By: Ecora Auditor Professional 4.5 - Unix Module 4.5.8111.18300

Using: Unix Filesystem use trend report (Change Report)

Description: A Change report allows you to save time by pinpointing what has changes on a set of servers or devices over time. Run a full change report to automatically flag any changes in servers and workstations through out your environment. With customization, the report will only flag changes that you are interested in seeing. Change reports are indispensable when it comes to problem resolution, because nine out of ten problems are due to changes.

Unix Filesystem use trend report

Table of Contents

1 Filesystem 2
 1.1 Filesystem Space Allocation 2

Collected Not-Collected Legend

DEFAULT	The value presented in the report was not directly reported by the target, but implied by the current value or lack of a value for the attribute
<i>*UA*</i>	Unavailable attribute. The current configuration or version of target platform does not provide a value for this attribute. More detail in logs
<i>*FC*</i>	Collection of value failed
<i>*NS*</i>	Value not selected for collection
<i>not present</i>	Vector element that exists in the target or reference data is not available for comparison
