By: Ecora Auditor Professional 4.5 - Unix Module 4.5.8118.18311

Using: Full (Change Report)

Description: A Change report allows you to save time by pinpointing what has changes on a set of servers or devices over time. Run a full change report to automatically flag any changes in servers and workstations through out your environment. With customization, the report will only flag changes that you are interested in seeing. Change reports are indispensable when it comes to problem resolution, because nine out of ten problems are due to changes.
